VISHWA GAURAV SHUKLA

Full Stack Software Engineer

+91 8887924395 | shuklavishwagaurav@gmail.com | linkedin.com/in/vgs-profile

PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience designing and delivering scalable, high-performance web applications. Skilled in full-stack development, system design and AI integration, with a strong focus on clean architecture, security and user experience. Proven ability to lead teams, modernize legacy systems and ship products end-to-end in Agile environments.

TECHNICAL SKILLS

Languages: JavaScript, Java, TypeScript, HTML5, CSS3, SQL
Frontend: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Responsive Design
Backend & Databases: Node.js, Express.js, RESTful APIs, MongoDB, MySQL, MSSQL, Sequelize ORM
Cloud & DevOps: Azure, Git, GitHub, CI/CD, Azure App Service, Application Insights
Security: Single Sign-On (SSO), JWT (HS-256/RS-256), Role-Based Access Control (RBAC)
AI: LLM Integration, AI-Assisted Development, Prompt Engineering, OpenAI API, Claude Code
Practices: System Design, Performance Optimization, Agile/Scrum, Code Reviews
Core Competencies: Debugging & Problem-Solving, Data Structures & Algorithms (DSA), Communication Skills

PROFESSIONAL EXPERIENCE

Software Developer | 98thPercentile | Dec 2023 – Present

- Built an AI-powered Performance Manager that rates teacher classes by analyzing transcripts and videos with dedicated LLM prompts, delivering program-wise feedback and teacher presentation assessment.
- Developed a pre-planned class scheduling system that auto-creates calendar events for teacher and student classes and maps the curriculum resources to be taught in each session.
- Automated teacher allotment using a best-match criteria engine to assign the most suitable teacher to each class.
- Engineered a student learning platform on Next.js, Express and MySQL (Sequelize) on Azure App Service, with Azure SSO, Parent OTP login and Azure Application Insights monitoring.
- Established team engineering standards (coding guidelines, a 10-point PR review checklist, conventional commits) and embedded AI-assisted development with Claude Code into daily workflows.
- Architected and deployed Single Sign-On (SSO) across cross-platform microservices, reducing login latency by 35% and supporting 10K+ active users with 99.9% uptime.
- Led and mentored a team of 5 frontend developers; established clean-code and modular architecture standards that improved delivery efficiency by 40% and reduced post-release bugs by 60%.
- Redesigned the Role-Based Access Control (RBAC) system with a four-level permission hierarchy, enabling granular admin control and reducing unauthorized access incidents by 60%.
- Unified 6+ React codebases under a shared design system and reusable component library, reducing UI redundancy by 40% and frontend maintenance time by 35%.
- Integrated LLM-powered AI modules into the React frontend for contextual content generation and smart user assistance, improving task completion speed by 45% and user engagement by 30%.
- Migrated a legacy Laravel monolith to a React.js + Node.js microservices architecture, improving scalability and responsiveness by 30% and cutting deployment cycles from 2 weeks to 3 days.
- Built responsive, role-based dashboards and portals (CMS, Admin, Student, Teacher, Parent, Operations) with real-time API integration and data visualization, raising usability scores by 25% and cutting onboarding time by 40%.

EDUCATION

Bachelor of Technology (B.Tech) | AKGEC, Ghaziabad | Aug 2019 – Jul 2023
